| Ganoderma                 | -              | -               | -              | -               | -              |
| Myxomycetes++             | -              | -               | -              | Rare            | -              |
| Pithomyces++              | -              | -               | -              | -               | -              |
| Rust                      | -              | -               | -              | -               | -              |
| Scopulariopsis/Microascus | -              | -               | -              | -               | -              |
| Stachybotrys/Memnoniella  | -              | -               | -              | -               | -              |
| Unidentifiable Spores     | -              | -               | -              | -               | -              |
| Zygomycetes               | -              | -               | -              | -               | -              |
| Hyphal Fragment           | Rare           | Rare            | -              | -               | Rare           |
| Insect Fragment           | -              | -               | -              | -               | -              |
| Pollen                    | -              | -               | Rare           | -               | -              |
| Fibrous Particulate       | Rare           | Rare            | Rare           | Rare            | Rare           |

Category: Count/per area analyzed - Rare: 1 to 10 Low: 11 to 100 Medium: 101 to 1000 High: >1000

- Denotes Not Detected.  
++ = Includes other spores with similar morphology; see EMSL's fungal glossary for each specific category.  
\* = Sample contains fruiting structures and/or hyphae associated with the spores.

Vincent Iuzzolino, M.S., Laboratory Director  
or Other Approved Signatory

No discernable field blank was submitted with this group of samples.
